MD IMRAN HOSSEN

Dhaka, Bangladesh | imranhosein.cse@gmail.com
LinkedIn: linkedin.com/in/imranhc0 | GitHub: @imranhc0

PROFESSIONAL SUMMARY

Technology-fanatic Full-Stack Engineer and Team Lead with over 3.5 years of proven experience designing, architecting and implementing scalable microservices, high-performance APIs and the interfaces built on top of them. Promoted twice in three years at Pipeline Co., now leading an engineering team while remaining hands-on across Python (Django, Flask), Node.js and TypeScript on the server, and React and Next.js on the client. Robust expertise in database optimisation, event-driven systems, cloud infrastructure (AWS) and containerisation (Docker). Adept at tackling complex system design challenges, collaborating with stakeholders to deliver robust solutions, and mentoring developers to maintain high code quality.

CORE COMPETENCIES & SKILLS

Backend Engineering: Node.js, Python, Express.js, Django, Flask, RESTful APIs, Microservices, Cache Management, Kafka, WebSockets, Celery, JWT, ZOD, Prisma

Frontend Engineering: JavaScript, TypeScript, React, Next.js, Redux, Zustand, TailwindCSS, MUI, Cypress

Databases: PostgreSQL, MongoDB, DynamoDB, TimeScaleDB, Pinecone, Redis

Infrastructure & DevOps: AWS, Docker, GitHub Actions, CI/CD, Git

System Design: Scalable Architecture, API-first Design, RBAC, complex architecture problem solving

Leadership: Team leadership, mentoring, code review, sprint planning, Agile collaboration, stakeholder communication

PROFESSIONAL EXPERIENCE

Pipeline Co., Ltd — Cybersecurity SaaS

Mar 2023 – Present · 3 yrs 7 mos

Team Lead – Software Engineering

Aug 2026 – Present · Dhaka, Bangladesh · Hybrid

- **Team Leadership & Mentorship:** Lead and mentor a team of engineers, driving technical excellence, professional growth and delivery accountability.
- **System Design & Architecture:** Guide technical decisions and scalable software architecture, setting standards for API contracts, data modelling and service boundaries.
- **Project Planning & Delivery:** Lead sprint planning, task delegation and progress tracking, driving timely delivery of engineering initiatives.
- **Code Quality & Standards:** Champion code quality, maintainability and engineering accountability through review standards and shared conventions.
- **Cross-Functional Collaboration:** Partner with product and security stakeholders to resolve technical challenges early and keep delivery unblocked.
- **Hands-On Development:** Stay hands-on with full-stack development using Python, Django, React, Next.js and TypeScript on critical-path features.

Software Engineer

Jul 2025 – Aug 2026 · Tokyo, Japan · Remote

- **System Architecture & Microservices:** Designed and maintained highly scalable microservices for a security SaaS platform using Node.js (Express) and Python (Django & Flask), adhering to an API-first architecture and modern design patterns.
- **API Development & Integration:** Engineered and optimised RESTful APIs and real-time communication systems integrating Kafka and WebSockets, ensuring seamless data flow and high performance.
- **Database Management:** Optimised schemas and managed complex data pipelines across relational and non-relational databases including PostgreSQL, MongoDB and Prisma, ensuring high data integrity and scalability.
- **Full-Stack Delivery:** Built the React, Next.js and TypeScript interfaces consuming those services, owning features end to end rather than handing off at the API boundary.
- **Mentorship & Code Quality:** Mentored junior developers, led code reviews and enforced strict coding standards in an agile collaborative environment.

Frontend Developer

Mar 2023 – Jul 2025 · Remote

- **Frontend Engineering:** Built high-performance web applications using React, Next.js, TypeScript and Redux, ensuring responsive and scalable user experiences.
- **UI/UX Implementation:** Converted detailed Figma designs into clean, accessible interfaces, aligning UI/UX with business and user needs.
- **Testing & Stability:** Wrote end-to-end tests with Cypress to ensure product stability and performance across browsers.
- **Infrastructure & Deployment:** Managed CI/CD pipelines using GitHub Actions, deploying applications seamlessly to AWS environments.
- **Backend Support:** Supported backend development with Python, Flask and Jinja2, enabling smooth frontend–backend integration.

PROFESSIONAL PROJECTS

Risk Sensor | Real-time Cyber Threat Intelligence SaaS Platform

- **Backend & Cloud:** Architected the backend using Python (Django), Node.js (Express, TypeScript) and Go (Gin). Managed infrastructure and deployments utilising AWS, Docker and GitHub Actions.
- **Database Engineering:** Designed optimised data models utilising PostgreSQL, DynamoDB and Pinecone for high-speed threat data retrieval and vector similarity search.
- **Frontend Integration:** Delivered the React/TypeScript frontend on top of clean, documented and secure APIs, owning both sides of the integration.

ThreatIDR | Enterprise Zero-Day Attack Protection (DNS Firewall)

- **Backend Architecture:** Developed robust backend systems utilising Python (Flask) and Celery for asynchronous task queueing and processing.
- **Real-time Processing:** Integrated WebSockets for live threat monitoring and utilised TimeScaleDB and PostgreSQL for efficient time-series data storage and analysis.

PROBLEM SOLVING & COMPETITIVE PROGRAMMING

- **Algorithms & Data Structures:** Actively solve complex technical and algorithmic challenges across competitive programming platforms to ensure optimal code performance.
- **System Design:** Proficient in applying principles from complex architecture scaling, capable of designing fault-tolerant and high-availability systems.

EDUCATION

Bachelor of Science in Computer Science and Engineering
East Delta University · *Final Year*

Diploma in Computer Science Technology
Patuakhali Polytechnic Institute · Aug 2018 – Jan 2023

LANGUAGES & HOBBIES

- **Languages:** English, Bengali
- **Hobbies:** Playing Games (Cricket & Football), Reading Books (Novels)
